Innovation Driving Performance

Nitrol Stone Retrieval Baskets

**Sur-Catch Cross Paired Stone Basket**
Unique paired wire basket construction increases radial dilatation force to ensure manipulation and retrieval of stone fragments in tight, restricted anatomy. The shape of the wires on the distal end help prevent fragments from inadvertently rolling out during removal. Available in multiple diameters and tip configurations for all procedural needs.

**SurLok™ Flat-Wire Stone Basket**
Stainless steel wires open wide, promoting radial dilatation of the ureter and easy stone encapsulation. The ability to feel the basket opening and closing provides better control during stone capture. Wire outer edges are rounded to minimize mucosal trauma. Available with filiform tip and in 3-, 4-, and 6-wire designs.

**SurLok™ Helical Stone Basket**
Spiral shape helps engage and hold stones with greater efficacy. Rounded wires significantly minimize tissue trauma. Simple handle rotation facilitates easy capture of stones on the distal end with a filiform tip and in 3-, 4-, and 6-wire designs.

**SurLok™ Grasping Forceps**
A 3- or 4-pronged design gives greater control during stone removal by delivering a true feeling of both grasper and stone. Graspers securely attach to the stone surface but can also be easily released.

**STAINLESS STEEL BASKET COMPLETE FAMILY OFFERING**

**Unique features**
- Durability: Twisted wire cage design with the patented no-tip disc maintains shape in even the most challenging cases.
- Performance: Secure grasp and easy release of stones.
- Ease of Use: Single handed rotation with an intuitive basket actuation improves efficiency.
Ultra-Catch NT

The simple four-wire basket design allows for easy capture and release of stones. The no-tip design with round wires is safe for intrarenal use and minimizes tissue trauma during manipulation. The torque responsive shaft and ergonomic handle provide the control and security to ensure safe and effective stone removal.

- Highly-durable, twisted-wire cage design maintains its shape and form even under extreme duress.
- Atraumatic distal disc tip designed to minimize trauma.
- Available in 1.8, 2.2 and 3.0 Fr sizes to accommodate most patient anatomies and physician preferences.
- Polymer sheath is designed for durability while eliminating sheath compression or stretching.

NEW EASY-GRIP, NO SLIP HANDLE WITH INTUITIVE BASKET ACTUATION: maximizes efficiency through an ergonomic design aimed at minimizing effort and discomfort with a very intuitive design.

- Gel-like grip is designed to prevent the handle from slipping.
- A rotation wheel at the front of the handle makes basket manipulation a single-handed operation.
- Intuitive basket actuation mechanism moves in the same direction as the basket reducing confusion.
- The introducer conveniently snaps onto the handle when not being used and can easily be unsnapped for use.

X-Catch NT

PRECISE CONTROL. VERSATILE PERFORMANCE: This unique cross paired-wire basket is designed to provide higher radial dilation force for stone manipulation in restricted anatomy. The paired construction enables capture of several small stones in one pass. The X-Catch NT basket has the performance and versatility to save you time and ensure successful outcomes.

TRUE ROTATION WITH TORQUE-RESPONSIVE SHAFT: Designed to deliver excellent rotational performance to aid in the stone capture. Nitinol construction makes it kink-resistant thereby delivering superior safety, functionality and durability.

- Basket shaft provides good torque transmission with true one-to-one basket rotation.
- Highly-flexible distal end is designed to minimize scope deflection loss.
- 1.8 Fr basket demonstrates strong irrigation flow for better visualization.

No-Tip Disc Designs with Round Nitinol Wires: Patented distal disc design is truly tipless and offers atraumatic basket manipulation.

Twisted Wire Construction: Provides radial strength for manipulation in restricted anatomy and enhanced durability. Twisted wire construction provides improved stone grasp and quick release with rotation.

Intuitive Basket Actuation: Forward advances the basket, back retracts the basket.
